

Thermal Solutions of Texas distributes energy saving insulation systems for blown film die. These blankets are custom fit to your dies, flanges and feed pipe to ensure that they will never be in the way. This unique design allows for easy access for die changes and adjustment lugs.

### Benefits

- Extended life of heater bands
- Control process temperature
- Keep cold air lines cool
- Protect personnel
- Increase energy efficiency
- Reduce ambient air Temperature
- Decrease BTU by 88%

### Design Components

- 1 inch thickness
- Custom application design for die body, flanges and feed pipe
- Easy to install and remove
