

INSULATION BLANKETS

Thermal Solutions of Texas insulation systems are high return, low investment insulation blankets that can lower your energy bill, protect your employees and lower the ambient air temperature in your facility. We offer both off-the-shelf blankets, cut to standard length and width, that fit a range of applications. We also offer custom blanket solutions with notches, donuts, cut-outs, custom sizes and any other specifications you may require.

Applications:

- Plastics manufacturing machinery
- Engines
- Exhaust systems
- Hot oil and steam piping
- Backup/Portable power generation
- Mobile home and bus exhaust systems

Benefits:

- Lower energy bills
- Faster start up time
- Protect your employees
- Lower ambient air temperature
- Payback in less than 12 months

Thermal Solutions of Texas can distribute blankets for both under 500°F and over 501°F applications. Whatever your industrial application, we can create the perfect insulation solution for your needs.
