

ThermaSleeve by Unitherm is custom manufactured to insulate your silicone dryer lines to lower heat loss and conserve energy. Insulating your material dryer lines with ThermaSleeve allows a drying system to run up to 50% more efficiently. For most energy rebate programs, dryer hose insulation is a prescriptive product, which decreases project approval time.

Benefits

- Protects personnel
- Reduces heat loss and energy waste
- Decrease ambient air temperature
- Improves energy efficiency

Design Components

- 1.5 to 2 inches of insulation
- Velcro enclosure flaps
- Non-stick Teflon exterior
