**Edwards Signaling  
& Security Systems®**

## AdaptaBeacon® Rotating Lights

Perfect parabolic reflector intensifies and throws a brilliant beam of light. Ideal for use in security systems to indicate an intrusion or for use in industrial areas to signal equipment malfunctions in noisy areas. Available with six lens colors. Weatherproof.

UL and cUL Listed

## Compaxx™ Series Strobes

PLC-compatible Compaxx strobes deliver a powerful signal with a very low profile. Their small size makes them convenient to place in just about any industrial, commercial or institutional application. Available in surface-mount or pipe-mount versions with five lens colors. Packaged singly or in six-packs.

UL and cUL Listed

## AdaptaBeacon® Electronic Horn/Strobes

Surface and flush mount Electronic Horn/Strobes with 150 candela visual and 90dB audible output. Gray, flame resistant housings and five lens colors. Indoor and outdoor models available. Ideal for use in timing, scheduling, paging, process control, security and general alarm applications. 120V AC and 24V AC/DC models.

UL Listed

## Triliptical® Stackable Status Indicator

Stack up to five light modules with or without a tone module for maximum communication flexibility. You can choose from seven different light source modules and five lens colors – all with Triliptical diffusion lensing for greater visibility. DeviceNet and PLC compatibility complete the package.
