

Eaton's SPD Series: Discover the power of integration

The latest and most advanced surge protection system
for commercial and industrial applications

Maximize application flexibility

- Available in all common voltages
- Surge current capacity ratings from 50 through 400 kA
- Configurations for service entrances, distribution switchboards, panelboards and point-of-use

Save time & space

- Save valuable wall space with integrated SPD Series design
- Available pre-assembled in panelboards, switchboards, motor control centers, switchgear and bus plugs

Increase equipment protection

- Safest, most reliable and advanced UL® 1449 4th Edition certified surge protectors
- Factory installation reduces risk of contact with harmful voltages

Enhance performance

- Integrated design keeps installation conductor lead lengths as short as possible to maximize performance
- Direct bus connection without wire provides outstanding surge protection

Simplify indication

- Dual-colored LEDs indicate true status of protection
- SPD Series also provides indication of the N-G protection status

Decrease maintenance cost

- No user-serviceable parts or items that require periodic maintenance
- No wire lugs that require periodic retightening

Discover the integrated SPD Series performance advantage

Eaton provides a full range of innovative, reliable surge protection solutions to help reduce costly downtime and protect sensitive electronic equipment. Each product is independently tested and backed by the largest engineering and technical support in the industry.
