

Melt Pressure Transducers

- Solid State: Non-filled Pressure Transducer
 - ✓ **US Manf & Stock Availability of Hg, Oil & Nak Sensors**
- Melt Pressure Transducers (Eval/Repair Service)
 - ✓ **Quick Ship Pressure/Temp Monitoring Packages**
- Rupture Disks, Cleaning Tools, Cables & Accessories

Linear Displacement Transducers

- Potentiometric & Magnetostrictive Technologies
- Pneumatic & Hydraulic Solutions
 - ✓ Analog, Digital & Serial bus outputs

For measuring displacement of moving mechanical parts. Sturdy & Versatile; ideal for the majority of industrial applications, even under very harsh conditions.

Industrial Pressure Transducers

- 4-20 mA, mV/V, Vdc Outputs
- Wide Variety Options for Process and Electrical Connections- (Flush Diaphragm)
 - ✓ (-) 15 - 30 psi to 0-70,000 psi
 - ✓ Intrinsically Safe approvals available

Gefran industrial pressure transducers and transmitters measure liquid, or gas pressure in all industrial applications. Stock Availability of Hg, Oil & Nak Sensors

Process Controllers & Indicators

- Standard DIN Sizes (1/16, 1/8, 1/4)
- Pressure, Temperature and Process Controls
- Universal Input Process Indicators

For measuring displacement of moving mechanical parts. Sturdy & Versatile; ideal for the majority of industrial applications, even under very harsh conditions.

Solid State Relays & Power Controllers

- Single and Three Phase SCR's & SSRs
- Logic or Analog Control
- Standard Overtemp Protection

All-in-one units for rear-panel installation that combine microprocessor controller, power actuator, current transformer and (in multifunction models) fuse and fuse holder to control resistive/inductive/infrared loads in modern temperature control systems. Complete range up to 250A.
