

AutroXT extinguishant control system

Reliable fire protection

AutroXT extinguishant control panel BA-51/1 is a standard-compliant panel that – when used together with Autronica’s interactive fire detection systems AutoSafe 4 or Autoprime – enables automatic extinguishant release in critical areas where a fire would be catastrophic, like power plants, computer rooms, switchboard rooms or engine rooms.

The extinguishant control panel has two fully monitored inputs for connection to fire detection control equipment or addressable control modules to provide an EN 12094-1 compliant extinguishant control system.

Its many programmable features and extensive range of inputs and outputs

make the BA-51/1 suitable for all extinguishing applications where a fully featured control device is required.

The AutroXT extinguishant control panel BA-51/1 is connected to the AutoSafe 4 / Autoprime fire alarm control panel via two I/O units, each panel covering one zone.

Panels

Image	Part number	Description
	116-BA-51/1/GB	Extinguishant control panel, 1 zone., English text
	116-BA-51/1/I	Extinguishant control panel, 1 zone., Italian text
	116-KITD-BA-51	Kit including extinguishant control panel BA-51/1, dual monitored input unit BN-305 and single monitored input unit BN-304. Please specify language when ordering.
