

Product Highlights

- ✓ Provides even heat for Griffin and standard beaker heating applications
- ✓ Removable with Velcro®-like closure
- ✓ Moisture and chemical resistant – No need to worry about spills

Specifications

- Maximum exposure temperature: 232°C (450°F)
- Hook and loop closure allows for quick installation and removal
- Easily view graduation during set-up and operation
- Moisture, chemical and radiation resistant
- Heating element is laminated between two layers of 15mil fiberglass reinforced silicone rubber
- Power density: 5.0 watts/in² (0.008 watts/mm²)
- Dielectric strength of over 2000 volts
- 24 inch (61cm) long power leads with:
 - 120VAC: Standard 2-prong plug (NEMA 1-15)
 - 240VAC: Bare wire connection
