

# Freeze Protection

**HEAT • CURE • THAW • INSULATE • WARM • WRAP • PROTECT**

Thermal Solutions of Texas is proud to introduce the newest line of temperature heating products. PowerBlankets start warming your temperature-sensitive materials within minutes, distributing heat evenly with the patented GreenHeat technology.

Powerblanket's innovative heat spreading technology insulates, protects, and maintains heat in a wide variety of applications. A barrier of uniform directional heat is delivered where it's needed most – to prevent fluids from freezing and to ensure optimal flow.

- Certified to UL/CSA safety standards
- Standard package rated to -29°F
- Arctic package rated to -65°F
- Uniform distribution of heat
- Reduce downtime, increase profitability
- Highly efficient, low energy consumption

## Heated Pipe Wraps

- Maximize freeze protection to -40°F
- Engineered to maintain flow and pumpability
- Easy to install, uninstall and reinstall

## Drums and Cylinders

- Heat, insulate and protect materials
- Insulated design keeps heat in & cold out
- New Rapid-Ramp 2x heat technology

## Totes and Containers

- Safe on a wide variety of materials
- Maintain flow and workability
- Heat bulk materials and palletized products

## Thaw, Heat and Cure

- Thaw up to 24" of frozen ground
- Prevent concrete freezing and cracking
- Reduce cure time and increase concrete PSI

## Tanks and Silos

- Freeze protection for Water, Fuel, Chemicals and Food Products
- Wrap Large Dairy Silos, Petroleum Tanks, & Water Troughs

## Accessories

- Includes heat probes for accurate temp control
- Digital display for easy operation
- Used for pinpoint temperature regulation
