

Freeze Protection

Prevent freezing on a wide range of items such as pipes, valves, tanks, vessels, pumps, and more. Our products are designed to solve this critical application with a wide variety of heating solutions, in hazardous and non-hazardous environments, saving you time and money. Contact our team of application specialists for assistance. Thermal Solutions of Texas provides these freeze protection products:

■ Heating Cable

- *Self-Regulating/Limiting – Automatically adjusts heat output based on surface temperature.*
- *Constant-Wattage – Provides precise and constant temperatures up to 500°F*
- *Ideal for long runs on pipes and vessels*
- *Can be cut-to-length at job site*

■ Heating Tape

- *High Temperatures and Watt Densities*
- *Up to 1400°F (760°C)*
- *Extremely Flexible; Ideal for Short Runs*
- *Serpentine woven heating element*
- *Moisture and chemical resistance with silicone rubber sheath*

■ Drum Heaters

- *Durable, long lasting with large coverage and high wattages*
- *Exclusive FM approved hazardous-area silicone rubber drum heater*
- *Patented grounded heating element and easy adjustable temperature control*
- *Full coverage drum heaters and insulators maximize heat efficiency*

■ Tote Tank / IBC Heaters

- *Speed up the flow of products like honey, molasses, lube oil, biofuel, etc. stored in bulk containers*
- *Safely heat: Does not contaminate or scorch your product*

■ Silicone Rubber Heating Blankets

- *Easy-to-apply industrial strength pressure sensitive adhesive backing option*
- *Suitable for a large range of environments*
- *Moisture and chemical resistant*
- *Exclusive hazardous-area rated heater*
- *Exceptional durability*
- *Multi-stranded resistance wire*
- *Variety of sizes and configure-to-order options*
- *Built-in controlling options*
- *Your choice of attachment options*
