

Thermal Solutions of Texas Meeting the Needs of Manufacturing Customers

Leading Watlow Distributor Offers Customized Heater, Sensor and Control Systems

Houston, Texas (Marketwire) – May 4, 2010 – [Heater, sensor and control systems company](#), Thermal Solutions of Texas, has noted a steady increase in business in 2010.

The company, with headquarters in Tomball, Texas, supplies a large variety of [electric heat](#), [temperature control](#) and, industrial automation components. Their climate controlled warehouses hold a vast array of temperature related product lines that include electric heaters, temperature controllers, thermocouples and accessories. The staff of trained applications specialists provides custom solutions for a wide range of industries.

Thermal Solutions of Texas is proud of their affiliation with [Watlow](#), and is a leading distributor of heaters, sensors, controllers, accessories, control panels and software. One of the largest custom designer and manufacturer of industrial electric heaters and sensors in the world, Watlow backs up their products with a three-year warranty and technical support.

Jeff D. Peterson just completed his first year as Owner/President of Thermal Solutions of Texas and brings a solid background in the industry. He previously served as General Manager of TSCI and prior to that spent 10+ years as an Account Manager serving the Gulf Coast region of Texas, Louisiana and Mississippi. Peterson and office manager Sherry Griffin lead a team committed to delivering the highest standard of customer service to their clients.

"We are excited about what we have accomplished in a short amount of time and in such a tough economy," said Griffin. "We couldn't have done it without our loyal customers and the honest hard work of each of our employees. We are all looking forward to expanding our capabilities, product lines and most of all complete Thermal Solutions for our customers."

Thermal Solutions of Texas serves some of the top companies in the Gulf Coast, including Igloo, NASA, Halliburton, Shell and Exxon. In addition to a vast product line, Thermal Solutions of Texas offers custom designed turn-key thermal systems and both stock and custom control panels. New programs include a full service maintenance program and custom control programming.

About Thermal Solutions of Texas

For over 25 years, Thermal Solutions of Texas has served a broad range of companies in the Gulf Coast area for heating, sensing and controlling thermal processes. The company has built [custom thermal integrated heating](#) and control systems for clients in the aerospace, oil and gas, plastics, medical and general manufacturing fields. The experienced team of trained application specialists makes on-site evaluations to fully evaluate the need for each facility, industry and client. Thermal Solutions of Texas also provides services such as maintenance contracts, [heater evaluation](#) and repair, custom control programming, inventory management, on-site training and an emergency stocking program.
