New Austin Location

Thermal Solutions of Texas expands once again with a new office in Austin, Texas. Thermal Solutions is a master stocking distributor and manufacturer for such product lines as Watlow, Tempco, Chromalox, Brisk Heat, Dalton Electric, Nexthermal, Process Technology and many more. The company has headquarters based out of Tomball, Texas, just north of Houston and serves Texas, Louisiana, Oklahoma, Mississippi and Arkansas with its distribution lines. Thermal Solutions of Texas also designs and manufactures complete thermal systems and temperature control panels used worldwide.

Thermal Solutions of Texas has served the Gulf Coast area for several years providing heaters, controllers, thermocouples and control panels to all facets of manufacturing and industrial industries. Some of their emerging market segments include renewable energy production such as wind energy, solar energy and biofuels along with Semi-conductor manufacturing.

John Fox, Sales Engineer, will be heading up the new office and local support of products and engineering services covering the Central, West and North Texas territories. John will be responsible for new and existing end-users and OEM's in addition to looking for qualified sub-distributors of Thermal Solutions control panels and thermal systems. John has been in the industry for 25 years and previously worked directly for Watlow and Chromalox, offering a tremendous amount of knowledge and experience to Thermal Solutions of Texas and its customers.

"Thermal Solutions has been serving Central Texas for a few years without a local office, and they have done a good job doing so, but with my extensive knowledge of the product lines, customers and the expansive manufacturing capabilities of Thermal Solutions I am sure that we will offer better improvements and solutions to our customers." said John Fox, Sales Engineer & territory Manager.

Thermal Solutions of Texas is proud to be the premier source for heating products and temperature control systems to customers like Exxon, NASA, Igloo, Halliburton, Chevron, Dow Chemical, Dupont and many other manufacturing and industrial companies around the world.

President Jeff Peterson said "It is amazing to see how much we can improve the manufacturing processes of our customers in as little as one visit. We work with thousands of small and large manufacturing companies who greatly depend on our large product stock and our engineering and design capabilities. We dive into very complex projects and simplify them for our customers by providing them turn-key solutions with the best products, services and a staff of people who care about making our customers jobs easier."

Thermal Solutions of Texas also specializes in providing evaluation and repair on immersion heaters, band heaters, cartridge heaters, cable heaters, silicone rubber heaters, temperature controllers, furnaces, ovens, control panels, lab consoles and many other specialized Thermal systems applications.
